President and CEO
Koichi Shimada

Our target is to deliver products which are more accessible and even more useful than now, and to reach more people who are needing us.

Towards the Alfresa Group's target of "Realizing a Healthcare Consortium which can provide products and services in all healthcare fields," Alfresa Pharma commits itself to contributing to health improvement for people all over the world through research, development, production and marketing of pharmaceuticals, diagnostics, medical devices and other health-related products, especially through our specialties shown below:

Medicine against such CNS (central nervous system) diseases as sleep disorders and epilepsy, Test devices for colorectal cancer screening, Rapid diagnostic test devices for various infectious diseases, and Surgical sutures for which we have technology and a long experience.

Focusing on safe, secure and honest operations, Alfresa Pharma will continue R&D activities and constant supply of high-quality, high added-value products, ensuring a company system meeting various medical needs.

Products and Services

Ethical Drugs:

While focusing on neuropsychiatric and allergic disorders, we meet various medical needs.

In-vitro Diagnostics:

Meeting needs for higher accuracy and quicker diagnostic results, our in-vitro diagnostics contribute to early detection of various disorders.

Exported products:

We export not only our company's but also other companies' medical devices, diagnostics and reagents.

Healthcare products:

We deliver products accessible to people and useful for their health.

Medical devices:

We provide a wide variety of highly functional, quality medical devices.

Imported products:

We import medical ingredients and functional food ingredients which are hard to find in Japan.

Other products:

We deliver creative products which help improve health.

Equipment and facilities

Fluid-bed granulator/drier

Accepts various granulation methods and production volume.

Filling machine

We can perform filling operation under a sterile environment equivalent to Aseptic Class 100.

PTP packing line

This sophisticated equipment completes all the processes for PTP (press through pack) packing including the final packing.

The attraction Alfresa Pharma holds

With a culture of openness and trust, our internal human relations are harmonious and peaceful regardless of office positions, in the clean factory buildings. Our production items are increasing, so are employees, resulting in a lively workplace. Enthusiastic employees are entrusted with a wide range of work and can gain wealth of knowledge and experience.

Work description

Production: Production of medicine and diagnostics.

Quality control of medicine and diagnostics produced:

Quality of the active ingredients, other ingredients and final products are tested.

Quality assurance of medicine and diagnostics produced:

We check that our instructions for production in the Okayama Pharmaceutical Factory and the instructions from governmental organizations are observed.

Development of production technology for medicine and diagnostics:

We plan and perform verification tests for new articles to be industrially produced, and design ingredient composition.
