President

Tetsuro Takemoto

Innosho Forestry supply valuable wood, which is recyclable, to Japanese and overseas customers. We work on assuring quality and maintaining environment under consistent control over the complete processes from cutting down timber to processing wood, sales, and construction work on site, such control being quite unique in Japan. We help our customers build their dream houses, aiming at creating each house as a long-lasting asset inherited from one generation to generation.

Tokyo Logistics Office:

2-15-12, Kiba, Koto-Ward, Tokyo

Housing Material Center:

158-2 Jingo, Tsuyama City, Okayama Prefecture

Products and Services

1.Sawing and sales of Japanese cypress

We produce pillars (including through pillars) and house foundations, both made of solid Japanese cypress. Our staple product in this field is our original brand "Takumi Kantaro", pillars made of dried Japanese cypress without any back split.

2.Production and sales of laminated wood

We make laminated wood by gluing Japanese cypress material, or by gluing lamina which is imported from Scandinavia and North America. Our staple product in this field is "Eco Earth Wood" made of legally cut Scotch pine from Scandinavia.

3.Precut

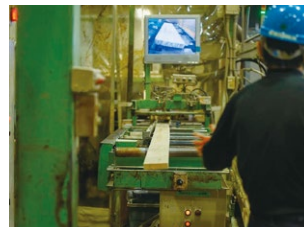

We mortise wood material, or cut a slot in wood to join securely, as with a mortise and tenon.

4.Sales of housing material

We sell housing wood material and such household equipment as sashes and integrated kitchen systems.

We can cut down timber on your mountains and buy your standing timber, both being your valuable assets.

We produce wood material for houses and buildings: solid natural wood and laminated wood.

We can precut sawn wood as required to your requirements.

Overseas business

We import laminae (material for laminated wood) from such Scandinavian countries as Finland and Sweden, and such North American countries as Canada. All imported wood has been of trees cut down legally, conforming to the requirements of the SGEC (Sustainable Green Ecosystem Council). As for our exports, we sell Japanese cypress boards to such Asian countries as China and Korea.

Factory tour, internship, etc.

We accept trainees in our company and offer factory excursions for those who wish to work with us. Please write to us through Contact on <http://innosho.co.jp/en/>. We publish information about trainee recruitment on our web pages, Instagram and Facebook.

Ideal applicants

An ideal applicant is a person who has developed an independent identity. This does not only mean he acts on his own initiative but he is also responsible for his own life. Your 'now' is the result of your decisions and choices. We expect an applicant who sets up his own challenges and work to meet them, then learning from mistakes, find new challenges and work.

Message to applicants

Innosho Forestry, with its company mission being "to create warm and comfortable wooden space", manufacture products which people would use and love for generations. We await job applications from those who are ready to meet our challenges with us.
