Products and Services

Press working:

Pressing of metal parts for apparel and electronic devices.

1. Metal parts for apparel.

Our Japanese market share in production of hooks and eyes for apparel is the top and we produce about 7,000 different items.

2. Electronic parts.

We produce pressed parts for mobile telephones, computers, digital home appliances, automobiles, and medical devices.

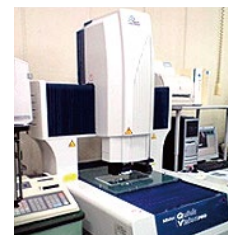

Equipment and facilities

Progressive pressing facilities: from 5 to 300 tons (40 units in total).

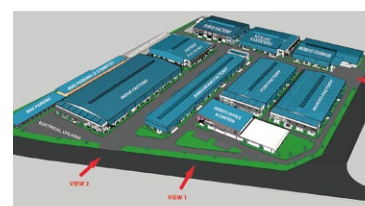

Wire-electrical discharge machine

3D automatic measurement machine (laser, images, etc.)

Overseas business

Established in 1952 in Osaka, Japan as a producer of apparel accessories, we have developed our business as a producer of hooks and eyes for apparel. Participated in trade fairs in Japan and in foreign countries and exhibited our main products there, we developed sales channels in America, Europe and Asia. In 1997 we started production of electrical parts, for which quality standards and technical requirements are higher, and have been further improving our technology and know-how we cultivated. Moreover, in order to go forward with a global view, we built a factory in Danang City, Vietnam, which started operation in the spring of 2012.

Factory tour, internship, etc.

Open Factory Day in the Tsuyama Area Factory tour of Oishi Industries' Okayama factory

Every year we participate in the company advertisement event: the "Open Factory Day in the Tsuyama Area" which is organized by the Tsuyama Business Support Center and Okayama Prefecture's Mimasaka Center for Residents. This is to inform people, especially children in elementary, junior and high schools in and out of the Tsuyama area, of the merit of the factories and their manufacturing businesses in the area and, in later years, to help promote post-graduate, university and high school graduates to join those companies, to motivate the present workers in the companies to grow more, and to attract people to them and their products.

Recruitment history

Kindai University, Okayama University of
Science, National Institute of Technology
(Tsuyama College), Tsuyama Technical
High School, Katsumada High School ,
Nihonbara High School

Recruitment history

We care about product quality ensured by cutting-edge technology. To further strengthen our technology triad (design and making of dies; precision press work; and production technology), every worker needs to always think about improvements, strive to achieve objectives, and quickly correspond to market needs. To this end, we always welcome young, energetic people and, also, those who are experienced in their own fields, all of whom are ready to join us in our effort to meet business challenges.

Ideal applicants

A young person who is always positive, energetic and ready to voice his idea of what he wants to do or how to do things better, or a more senior person with experience who is ready to do new things.
