President
Kenshi Saito

Saito Nensi Co., Ltd. have been committed to quality products, constant supply of them, and addressing customers' needs, resulting in continuously good management and financial condition since its foundation. Though our surroundings are changing very fast, everyone at our company are striving to adapt to the trend of the times.

Our management philosophy:

In order to make both our customers and us happy, we ensure customer satisfaction and improve our business continuously.

The mottoes of the company:

- We understand the meaning of "1+1=2.5" and make an all-out result.
- We ferment an honest corporate culture and make workplace fulfilling and rich in humanity.
- We strive to be a leading company, enthusiastically finding ideas in advance of the times and tackling objectives with perseverance.
- We do our best for our customers to prosper.

Products and Services

Since its foundation in 1967 (then as a private business) we have produced such products as yarns and ropes which customers needed. Yarns are made of many types of fiber, such as natural fibers (hemp, cotton, etc.) and chemical fibers (common ones such as polyester and nylon; ones for such super high strength yarns as ultra-high molecular weight polyethylene, liquid crystal polymer, and aramid; and various functional yarns). Our yarns are used by major apparel makers, and used for car safety apparatus, fishing gear, etc. In 2010, we installed a gut production line and started designing and producing grass cutting cords for gardening, and fishing guts.

Equipment and facilities

False twisting machine:
A machine which processes yarn so that it stops material ends from fraying.

For seat belts
A machine which twists yarn for seat belts.

For No.50-count sewing yarn:
A machine which processes No.50-count lock-stitching yarn.

Overseas business

In 2003, we established our fully owned factory and production/sales affiliate in China, where major Japanese apparel makers' factories had been in full-scale operation. We have since been running the Chinese factory as our Chinese base of production and sales and, at the same time, a procurement and supply base for Japanese and other Asian customers. (Yarn production result: 65 tons/month as of November 2019.)

In 2014, Saito Nensi and its Chinese affiliate jointly established a factory and production/sales company in Bangladesh. It has been run as a production base of yarn for major Japanese apparel makers over there, also as a procurement base for Japanese and other Asian customers. (Yarn production result: 25 tons/month for November 2019.)

Recruitment history

Message to applicants

Our main products are yarn and yarn-related products. They are around us in everyday life and we can see them anytime. In other words, our products are very widely used and, depending on how we think about it, our business has many chances. In fact, we have customers in wide variety of industries: car production, apparel production and such hobby fields as gardening and fishing, etc. We hope you join us and, with your rich sensitivity, tackle project planning, production, sales or management assignments.
