President

Akihiro Tan

Name of president (or factory director); greetings; company mottoes

In April 2015, Nippon Shokusei separated its production division into a new company Nisshoku Green Factory. Since its establishment, we, together with Nippon Shokusei, have been leading the greening (or slope protection) industry with our active research and development activities and fresh ideas. As a leading manufacturer in the slope protection field, we deliver various products and technologies against landslide disasters or for restoration of a devastated area, to customers all over Japan. According to our motto throughout the Nippon Shokusei Group companies "Employees are a vital asset to the company," we respect everyone's individuality and mobilize their power to reach our aim of being an excellent company with a small number of capable people.

Products and Services

As an affiliate of Nippon Shokusei, we specialize in production of greening material for civil engineering use, called environmental greening products. These products are for greening manmade slopes in various areas such as in the mountains and at riverbanks. According to our motto "Create a green country full of sunshine," we contribute to preserving the nature's bounty for coming generations and to maintaining environment for people to live safely and restfully. We operate in close cooperation with our parent company Nippon Shokusei.

Equipment and facilities

Our manufacture starts with getting hold of good seeds.

Every one of us commits to production passionately.

Our greening products are sent to construction sites all over Japan and used for greening the Japanese land.

Ideal applicants

A person who:

- Can have new ideas and challenge objectives, never stopping finding possibilities for improvement.
- Can tackle business tasks with desire to improve himself, but humbly.
- Is filial to his parents, showing gratitude to those who were close and raised him.
- Can overcome difficulties and problems, in cooperation with the people around, and grow from such experiences.
- Thinks that working in such fields as nature and environment is rewarding.

Message to applicants

Nippon Shokusei Group are "pioneers in the greening industry," leading the industry with original research and development activities and new ideas. In order to build bridges between nature and humans, we are challenging new objectives such as greening riverbanks and entering the Chinese market. Wouldn't you like to work with us towards "creation of a society where nature and humans can ideally coexist with each other"?
