President

Chobe Tanaka

After establishing the company as an eraser manufacturer in 1948, we successfully developed adhesives for footwear by utilizing our expertise. We have since made various contributions to production and quality improvement of shoes. Even now, our adhesives for footwear holds 60% of the Japanese market share. Also, to meet the market needs, we have developed a wide variety of adhesives for many fields, such as automobiles, construction materials, and wooden furniture.

A big goal of ours is to offer "new adhesive technology which can be the driving force for the 21st century." Together with our employees who are enthusiastically tackling this difficult goal, we will strive to make our dream come true.

Products and Services

We produce all types of adhesive: for shoe making, construction, building material, furniture, carpentry, automobile, paper, food, etc. Our products are used in a broad range of fields, contributing to various types of manufacturing.

Equipment and facilities

The 5000L Stirrer
A pot for producing adhesives.

Microscope
Analyzing adhesives thoroughly for further development.

The first and the second material warehouses are under construction.
